説明			
<p>This is a plugin for Redmine. Redmine support file tab and URL of each file for the project. Multiple files can be uploaded with the same name; however a link within the wiki will only show the most recently uploaded one. Redmine does not support recent uploaded file link when you changed the text editor format for HTML format using like CKEditor. This plugin supports an absolute file URL that it is the most recently uploaded one dynamically.</p>
