説明			
<p>The problem with this, is that the Activity section is the first page I go to see if anything has happened in my project. So someone with 'wiki delete' and 'file delete' permissions could go in, and delete pages and files. I would never know if they did this until I checked the wiki manually.</p> <p>What I would do is this:</p> <p>For files added to the wiki, I would add a link to the page in the Activity section</p> <p>For files deleted in the wiki, I would add a link to that wiki page in the Activity section</p> <p>For wiki pages deleted, I would just add text saying what page was deleted in the Activity section. We cant link to</p> <p>a page that no longer exists.</p>			
journals			
Also, Activity doesn't show updates on issues.			
All updates seen only in email or Issues tracker:(
May be a feature request rather a defect, but yes: I agree with this addendum to Activity tab.			
<hr/>			
<hr/>			
<hr/>			
This feature is still not implemented. Just tried in Redmine 2.1.2-devel.			
<hr/>			
This is the oldest issue (feature) alive now! Almost 10 years.			
<hr/>			
I agree :)
