説明			
<p>As we talked about in the discussion forum, please add mailing list support, with the ability to search mailing list archives.</p> <p>Thanks,</p> <p>Dan</p>			
<p>journals</p> <p>I would add that looking at how Roundup (a python based issue tracker) deals with emails/ mailing lists could provide some interesting contrast to how they usually work.</p> <p>http://roundup.sourceforge.net/</p> <p>I know there a branch for the mailing_list stuff. Just curious what the state is...and if you need to someone to work it.</p> <p>Also look at the Debian bug tracking system, if you plan to implement this. http://www.debian.org/Bugs/ GNUEmacs just started to use it as well, so fresh newcomers experience can be found on emacs-devel mailing list archive. I also enjoy email integration in BTS, but I know it is a really non-trivial issue. MANY things can be learned from existing systems.</p> <p>@Daniel: please link to the forum thread you'ra talking about.</p> <p>Hello, for the record:</p> <p>branch : http://www.redmine.org/repositories/browse/redmine/branches/work/ mailing_lists</p> <p>and i guess the forum thread is.. (?)</p> <p>http://www.redmine.org/boards/1/topics/show/1435</p>
