説明

It would be nice to have one button to create one PDF taht contains the following:

- Project overview
- Gantt diagram over a certain period
- Overview of all issues
- Detailed report of all issues, categorized after status.

This should be straigh forward since all of this already exist, it is just a batch to create everyting in one go.

The thought behind is to generate monthly reports on a certain project.

/MartOn

journals

I would also really like this. Monthly or biweekly project reports

in one pdf would be great.

Hi,

It wouldn't that hard indeed. It's just that there almost one

feature request per day.

+1

I specifically need categorized reports. Not only a general report, besides reports to know the progress that users (developers) made at them projects.

+1

+1

It will be nice to have export to PDF option to "Issue Summary Report " <http://www.redmine.org/projects/redmine/issues/report> Page
