説明			
<p>This is something we came across. We needed to define a line of text at the bottom of each email: " Please contact Director of IT if your issue wasn't resolved properly". This is pretty straight forward, just went into _issues.rhtml and adjust it. But it makes it system wide, and you need to be a developer or at least have access to source. I was wondering if it would be a good idea to add it as a feature to the admin interface, so users could define stuff like that on per project basis, modify their templates or something, or just add a little message, like a link to a demo page or something, so it is not hard coded into email template.</p> <p>Thank you</p>			
<p>journals</p> <p>Hi, As of r858, emails footer can be customized in the admin interface (Admin -> Mail notifications).</p> <p>For now, this setting can not be overridden at project level.</p> <p>+1 for being able to override the system-wide emission e-mail address in each project.</p>			
<p>+1</p> <p>+1</p> <p>Typo.</p> <p>+1</p> <p>+1</p>			
<p>related_issues</p> <p>relates,New,4015,Make app settings overridable at project level</p>
