It would be so convinient and productive if redMine supports keyboard shortcuts like Trac or some nifty web apps.
For example, press Ctrl+R to preview, Ctrl+S to submit, Ctrl+/ to enter search text, ...

To support above, we would only need to add "accesskey" attribute to elements (like input, a).

Thanks,

**journals**

Added the following accesskeys in r804:

- e => edit
- r => preview
- f => quick search
- 4 => search

## Reopen this request if you have any other proposal.

It would be useful to write in the "title" attribute of every "a" tag with an accesskey a description of the keyboard shortcut, for instance: "Bold (Ctrl+B)".

CTRL+Alt+P => go to projet

In Issue edit:
Ctrl+Alt+S => Focus on Status
Ctrl+Alt+A => Choose file to attach popup (if is possible)

In "Notes" area:
Ctrl+P => pre

Less important:
Ctrl+B => Bold
Ctrl+I => Italic
Ctrl+U => Underline

---

---

Up!

## Today every modern platforms support hotkeys... All except favorite Redmine.

And, generally, for editing/updating stuff:

# Ctrl+Enter => Submit

Some hotkeys (for example: Ctrl+Enter) implemented here: https://github.com/sasha-ch/redmine_hotkeys_js

## Bugreports, feature requests and pull requests are welcome.

## + Ctrl+Alt+P: project list select open (use jquery.select2 plugin)

## + "ArrowDown", "ArrowUp", "Space", "Enter" to quickly navigate issues list

## I have implemented some shortcuts in "Redmine Shortcuts Plugin": https://www.redmine.org/plugins/redmine_shortcuts.

Our helpdesk "Zammad":https://zammad.com has "hotkeys":
https://user-docs.zammad.org/en/latest/advanced/keyboard-shortcuts.html for copying the ticket ID along with URL and title which I find extremely useful:

Ctrl+Shift+.    copies only the ticket ID (#449)
Ctrl+Shift+..   copies the ticket ID and title (#449: Redmine: Keyboard shortcuts)
Ctrl+Shift+...  copies the ticket ID, title and URL (https://www.redmine.org/issues/449 Redmine: Keyboard shortcuts)

## We probably send up to a hundred Redmine ticket links in our company chat every day; a way to easily include the project and ticket title seems extremely useful to me.
