Currently, in order to add a note (comment) to a ticket, it is necessary to "Update the ticket". While I think its fine that its possible to add a note while updating the ticket, I also think it would be better if the user was also able to click a "reply" button on each existing note and edit the new note directly underneath.

This has the following benefits:

- Minimizes scrolling
- Keeps the edit box focused to the job at hand
- Would enable thread / targeted reply support

journals

oops... subject should be: reply button/link after each *existing* note

Done in r1480.

related_issues

relates,Closed,391,Links to notes/comments/replies in issues.
