<b>説明</b>			
<p>in 0.6 users has "Hide my email address" feature that is VERY usefull. But it might be usefull to have global setting "Hide all email addresses". For example, if administartor wants to allow communications with RM only. There might be variations like "hide emails for project", "hide emails for role" or "force hide email for certain user".</p>			
journals			
<p>I agree with this feature, which have interesting privacy concern for consequent firms.</p> <p>My +1 :)</p> <p>+1 also.</p> <p>Sometimes you can't allow the customers to contact the developers directly.</p> <p>#707 is not the same, but it is related to this.</p>			
+1			
<p>Are there any news?</p> <p>We are facing the same problem, please let me know how to fix this thing.</p> <p>Required features:</p> <ul style="list-style-type: none"> <li>• Only administrator can show/hide emails for any user.</li> </ul>
