説明

It would be great to track not only hours spent on an activity but start and end time (and the resulting time spent). It would be perfect to enable Redmine as a base for some sort of project billing.

journals

As long as this is optional. I personally find that level of detail onerous when filling out time forms. YMMV FWIW etc etc.

It could be resolved by #772

Ah, that's a great pointer. I'd go along with that suggestion.

Yes, exactly what I was thinking of :-). Using custom fields seems to be very cool as only people who need extended information around time would have to deal with it. Would be great to see it in redmine....

Yes, this could be perfectly solved by custom fields in timelogs (#772)

Resolven in r1690 - just what I needed :-)

Thanks for the feedback :-)
