説明			
at least under postgres:			
ActiveRecord::StatementInvalid (PGError: ERROR: invalid input syntax for integer: "none" : SELECT * FROM users WHERE (users."id" = 'none') LIMIT 1):			
I've included a patch which fixes this problem, and as a bonus, allows setting the version to "none" as well, using a similar pattern to assigned_to.			
journals			
Thanks, patch applied in r1294 with the ability to set the category to 'none' as well.
