**説明**

On the repositories/revision view the file's link "View differences" on the right doesn't work:

p{color:red}. The entry or revision was not found in the repository.

I think the problem is caused by the fact that the link contains two slashes (.../redmine//trunk/...):

[http://www.redmine.org/repositories/diff/redmine//trunk/app/controllers/repositories\\_controller.rb?rev=1324](http://www.redmine.org/repositories/diff/redmine//trunk/app/controllers/repositories_controller.rb?rev=1324)

journals

**Fixed in r1325.**

On the repositories/revision the link "View difference" on the right does not work properly:

I got the message : The entry or revision was not found in the repository.  
when clicking on the view difference on the right side.

I generate the following url :

@  
<http://www.dawnoflight.org/repositories/diff/dolserver/DOLSharp/trunk/GameServer/commands/playercommands/Repair.cs?rev=1220@>  
when it should be  
@<http://www.dawnoflight.org/repositories/diff/dolserver/trunk/GameServer/commands/playercommands/Repair.cs?rev=1220.@>

(Notice that "DOLSharp" is the project name.

This is a different problem.

It's due to the fact that your repository in Redmine points to a subdirectory of your subversion repository (not to the root of the repository). I'll try to fix it.

**Fixed in r1446.**
