説明

SCM : CVS

error info:

ActiveRecord::StatementInvalid (Mysql::Error: Duplicate entry '1-14' for key 'changesets_repos_rev': UPDATE changesets SET committer = 'cvs_zhengyi', s cmid = NULL, comments = 'no message', revision = 14, committed_on = '2008-04-17 03:18:10', repository_id = 1, commit_date = '2008-04-17' WHERE i d = 26)

I found in table 'changesets' there are two type format revisions, in 0.6.3 is only number , 0.7 is _number, so I deleted first type rows, page working again, maybe this is a bug.

journals

CVS version 1.11.22

r1355 should fix this problem. Can you confirm please ?

Should be fixed in 0.7.0 release. Reopen if needed.

Upgrade from 0.6.0 to 0.7.0, encounter following exception in Repository page:

ActiveRecord::StatementInvalid (PGError: ERROR: duplicate key violates unique constraint "changesets_repos_rev" : UPDATE changesets SET "scmid" = NULL, "comments" = E'file build.xml was added on branch x on 2008-04-17 10:56:18 +0000', "commit_date" = '2008-04-17', "committer" = E'user', "committed_on" = '2008-04-17 06:15:39.000000', "repository_id" = 2, "revision" = E'795' WHERE "id" = 797):

Rendering /home/postgres/redmine-0.7.0/public/500.html (500 Internal Server Error)

Francis, do you get this error every time you go to the Repository page ?

And does your Redmine server run multiple instances (eg. thin cluster) ?

Yes, I get this error every time open repo page.

There is only one instance of server running.

Since 0.7.0 is out, shouldn't this be changed to 0.7.1, so 0.7.0 appears as completed in the Roadmap?

I can't see how it can happen with a single instance.

Could you try to reload the repository (delete then reload the changesets) ?

Yes, i have clear changes and changesets, it is OK now.

OK, thanks for the feedback.
