説明

The right click feature on the page Issues does not work in Opera. No matter if alt+click, ctrl + click. no mouse-keyboard combination seems to activate the right click feature of redmine.

journals

Is your Opera java powered? What java, browser version, OS, etc you use?

Yes it has java. I've used the newest java version available right now. Firefox and IE also work fine.

Dunno, I've Opera 9.51, build 2061, w/o JRE, x86_64.

Alt+LeftButton gives me a "menu":<http://img88.imageshack.us/img88/2406/operaxg7.png>

I tried it with Version

9.51

Build

10081

Platform

Win32

OS

Windows XP

Java

Sun Java Runtime Environment version 1.6

XHTML+Language

Plugin not installed

didnt work

Did a test with a fresh opera 9.51.10081 on win32. Works fine.

Make sure you use ALT + LEFT click (right click behaviour can not be changed with opera).

Also make sure you click AWAY from the link, not ON it... I had forgotten about that myself :P

I think the problem might have been caused with FastCGI. I'm running Redmine with FCGI and the menus simply won't popup with alt + left click while on redmine.org it works.

I have the same problem. A right click on redmine.org works, but not with Firefox or Opera at my site.

so i've changed in context_menu.js:

```
@if (Event.findElement(e, 'a') != document) { return; }@
```

to:

```
@if (Event.findElement(e, 'a') != undefined) { return; }@
```

after this it's working.. in opera and firefox.

btw, you could also use: `@if (Event.element(e).tagName == 'A') { return; }@`

Philipp flip Führer wrote:

Wonderful! It works! Maybe this should be included in redmine as patch.

Fix applied in r1762. Thanks.
