説明

h2. In the parent project TimeLog Details view, Redmine create a duplicate logtime entry at edit time.

INFO

- Database: postgres (PostgreSQL) 8.1.11
- Ruby: ruby 1.8.6 (2007-09-24 patchlevel 111) [i386-mswin32], 2007-12-14 Release 26
- Rails: rails (2.0.2)
- Redmine: Version 0.7.1

BUG DESCRIPTION

In the parent project TimeLog Details view, Redmine create a duplicate logtime entry at edit time.

STEPS TO REPRODUCE:

Create a ParentProject

Create a ChildProject (subproject of ParentProject)

In the ChildProject, create an issue (let ' s say a task)

Create a logtime entry for the issue: ex.: filing bug report 0.5 hour.

From the ParentProject ' s TimeLog details view, edit step 4 issue ' s Hours field from 0.5 to 1.0 hour.

NOTES

- [%{color:blue}Observe there are now two logtime entries, the original one with 0.5 hour and the duplicate one with 1 hour. For my part, I expect only on entry.%](#)
- [%{color:blue}If you do the same steps at the ChildProject's TimeLog details view: there is not duplicate%](#)

Thank you

journals

Thanks for this detailed bug report.

It's fixed in r1713.
