説明			
The path parameter of the entries function			
entries(path=nil, identifier=nil)			
function must be escaped before it passed to the svn command line executable. And other functions using the path parameter is also changed as above.			
A related message could be found at: http://www.redmine.org/boards/2/topics/show/2396#message-2397			
journals			
I needed this patch to fix problems with the Norwegian characters ÆæØøÅå in the subversion view (at site.url/repositories/show/projectid/)			
After doing these changes it now works as expected.			
I can do manual svn operations using these characters on the command line on the same system. This is a Debian linux system, my system locale is set to "en_US.UTF-8" which should be all I need.			
Patch applied in r2004. Thanks.
