<b>説明</b>			
Git adapter uses Time.parse() on the date string, in the format @Sat Nov 8 02:20:44 2008 -0800@			
Time.parse() is unable to parse the timezone in the above date correctly:			
in irb:			
<pre>&gt;&gt; Time.parse("Sat Nov 8 02:20:44 2008 -0800") =&gt; Sat Nov 08 02:20:44 -0600 2008</pre>			
The correct output should be the following (notice the placement of the year segment)			
<pre>&gt;&gt; Time.parse("Sat Nov 8 2008 02:20:44 -0800") =&gt; Sat Nov 08 04:20:44 -0600 2008</pre>			
This is causing a major issue with the repository to have incorrect times.			
journals			
I added @--date=iso@ option to git commands in r1995. That should fix the date parsing problem. Can you confirm?			
You changed path to git in your commit.			
Might want to change that back.			
Sorry, fixed. Can I close this ticket ?
