**説明**

When I am reviewing issues or activity for a project, I often wish to view the same page for another project.

The "jump to project" combo provides an easy way to navigate quickly to another project, but the landing page is always the Overview. I think navigation would be quicker with this behavior.

journals

Agree. Would be very neat.

---

Feature added in r2210.

The tab is now preserved if possible.

Merged in 0.8 branch.
