説明			
<p>It would be very useful for me, if I could get a similar calendar overview, for Users vacations/out of office status etc.</p> <p>Currently, it could be solved if one create an issue, however, it would be even better if there would be a way to color the calender the whole duration this person is out of office, so its clear who is in and who is not.</p>			
journals			
<p>I do need this feature as well! Any news re this please?</p> <p>By the way it would be nice to see not only vacation days rather also hours-off.</p>			
+1

Just my 2 cents... ;)

<p>I agree, vacations are a very specific use case that would be best handled by a plugin. I know a recent version of the [[PluginSchedules Schedules]] plugin has some support for vacations.</p>
