**説明**  
The repository browser also shows deleted files and directories when using Darcs as SCM backend.  
It seems like it is necessary to process the File removed elements in the Darcs XML output in the "entries" method in darcs\_adapter.rb.  
Redmine version used: 0.8.0.devel.2163 (MySQL)

journals  
Just a note: Perhaps it is even easier retrieving the list of controlled files using "darcs show files"  
That's fixed in r2189. Thanks for pointing this out.  
Perhaps it is even easier retrieving the list of controlled files using "darcs show files"  
Maybe, but "darcs show files" doesn't give the patch that last modified each file.
