**説明**

Only part of activities are shown on the activity page.

For example, if activity time range is 30 days then it shows, say, 20 activities since month ago. More recent activities (21st, 22nd and so on) aren't listed.

If I change time range to 3 days, it shows recent activities.

journals

**This bug will be fixed in 0.8 final (see r2114).**

---

I'm reopening this bug since I see the same behavior in 0.8.4 .

I do see the recent revisions on the repository page.  
New news events do show upon the activity page.  
This is not the FAQ re: activity not refreshing.

It seems that only 1 day of feature/revision events are displayed. Maybe the first day with activity in the specified range for features and again for revisions.

I initially thought this was some kind of group by bug - but from a cursory inspection of the source this calculation of events to show is all done in memory.

Maybe it's interesting that I'm using postgresql 8.4 and git

eg: for 7.26.09 to 8.24.09  
only shows features/revisions from 7.28.09 (see screen grabs)  
looking back in git there was no activity on 7.26 or 7.27 but there was on 7.30 and 8.3

---

Please don't re-open bugs of completed milestones. This is now marked the 0.8 milestone as open again. It would be better to submit a new issue as 0.8 is already released.

Cheers

**Russell**

Closed the issue for the reason quoted from Russell. Please open a new issue for this and relate it to this issue (or ask someone to do that).

Mischa.
