If you have some/many projects and have to add some/many users, setting the Roles (and maybe other permissions) is quite cumbersome, so I propose

- grid overviews, that you can set the all roles (like Manager, Developer, Reporter) per +Project+ or per +User+ with *one Submit/Save*.
- maybe it's better to provide +radio button+ layout (rather than drop-down lists) for the roles
- checkboxes like +"apply change on all"+ projects/users or "check/uncheck all" would be great
- maybe providing a +filter+ for projects/users would be helpful
