説明

When the user assigned to an issue change, old assigned user should receive a notification to be aware of this update too.

New method in @journals.rb@

```
def old_value_for(prop)
  c = details.detect {|detail| detail.prop_key == prop}
  c ? c.old_value : nil
end
```

Updated method in @issue.rb@

```
def recipients
  recipients = project.recipients
  # Author and assignee are always notified unless they have been locked
  recipients << author.mail if author && author.active?
  recipients << assigned_to.mail if assigned_to && assigned_to.active?

  old_assigned_to_id = @current_journal.old_value_for('assigned_to_id') if @current_journal
  old_assigned_to = User.find_by_id(old_assigned_to_id) if old_assigned_to_id
  recipients << old_assigned_to.mail if old_assigned_to && old_assigned_to.active?

  recipients.compact.uniq
end
```

journals

+1

Implemented in r8695.

The issue was fixed in 2.x.

But after upgrading to Redmine 3.4.2.stable notifications to old assignee is absent!

related issues

relates,Closed,19197,Missing notification if assignee was a group
duplicates,Closed,9551,Changing assignee should be notify the previous assignee
