**説明**

I am getting:

```
TypeError (can't modify frozen string):
```

```
  /app/controllers/settings_controller.rb:44:in `<<'
  /app/controllers/settings_controller.rb:44:in `edit'
  /app/controllers/settings_controller.rb:22:in `index'
```

when trying to access '/settings'.

I am running the application using Passenger with URI my\_server/projects. In environment.rb I have set:

```
config.action_controller.relative_url_root = '/projects'
```

when I remove the line and run the Redmine application using scripts/server everything works just fine.

**journals**

Change line:

```
@guessed_host_and_path = request.host_with_port
```

to:

```
@guessed_host_and_path = ""
@guessed_host_and_path += request.host_with_port
```

in settings\_controller.rb around line 44.

This should be fixed by r2423.

Merged in 0.8 branch in r2425.
