<b>説明</b>			
<p>When I was creating #2792, I wanted a way to write:</p> <pre>"title":http://...</pre> <p>and have it show up exactly as that, except inline, not wrapped in a pre block. '!' will disable text such as [[... ...]] from becoming links, but it doesn't work for links like "title":..... It probably should.</p> <p>Alternately, there should be a way to turn off wiki formatting altogether for an inline chunk of text (not necessarily a whole block). Pre seems to disable some formatting, but not all: [[... ...]] still becomes a link inside a pre block, for example.</p>			
journals			
<p>Not a defect. As the [[RedmineWikiFormatting documentation]] says, it currently applies to Redmine links only.</p>
