説明

I have attached the Romanian translation, started from scratch.

It is professionally translated from r2548, all strings.

Files modified: config/locales/ro.yml, public/javascripts/jstoolbar/lang/jstoolbar-ro.js, public/javascripts/calendar/lang/calendar-ro.js.

rake test

gives no errors.

Cristi

journals

I have some updates for the translation. Do I attach the new patch file here?

Also, what should I do to have this added to the next release?

Thank you

Yes, you can attach the new patch to this ticket.

The new translation files will be released in 0.9

I'm not able to apply the attached patch cleanly. Can you post the entire file please?

yes, here they are :)

Here is ro.yml updated against source:trunk/config/locales/en.yml@2587

Committed and updated, thank you.

I have attached the patch for r2754 (latest ro.yml revision)

I have attached patch for untranslated strings from r2900. Thanks to all who also edited the translation.

Applied in changeset r2917.
