説明

Sometimes when working on large(r) wiki-pages (especially when using large tables) it could be very helpfull if there was a button available (e.g. on the bottom of the edit-window) to switch the wrapping inside the edit-window from on (default) to off (which is currently not possible).

This could be seen "implemented in a way":http://www.dokuwiki.org/edit_window#controls by "DokuWiki":
<http://www.dokuwiki.org> for example...
