adding the option to hide this field to the "roles and permissions" manager

journals

I've got something like this hacked onto my site right now that I can extract and cleanup a bit.

any news?

+1 It would be very good to get this, as we have to hide our estimations from some roles :(

+1 on this one!

+1

is covered by #8050

made a plugin for this: http://www.redmine.org/plugins/redmine_hide_estimated_hours

does anybody have version 1.0.0 of this plugin?

Assigned issue with no assignee back to New status.

+1 It would be great to have estimated times integrated in the allover times permissions system

+1

Add "View estimated hours" permission to the "Roles and permissions".

!{width:50%;border:1px solid #ccc;}add_permission_view_estimated_hours.png!

If the project has the "Time tracking" module enabled and the role has "View estimated time" permission enabled, the "Estimated hours" field is available.

I attached a patch.

Now the patch cannot be applied cleanly.

Fixed the patch to work on the current trunk(r19478).

Thank you for the patch. But I am hesitant to make this patch a candidate for 4.2.0. This is because existing users who can currently see estimated hours will lose access to it after applying the patch because view_estimated_hours will not be granted to no roles by default.

Adding a migration like the following will resolve the above problem.

```
diff --git a/db/migrate/20220315101502_add_view_estimated_hours_to_all_existing_roles.rb b/db/migrate/20220315101502_add_view_estimated_hours_to_all_existing_roles.rb
new file mode 100644
