Can it be that the field "Assigned to" was adjested with blinding to roles?

journals

hei!

Is any-body monitoring issues?

Yes, alot of us read the issues. This issue looka like a dupe for a few other, and are an issue that have had alot of discussions. That said, feature requests doesnt automagicly get fixed. Assigning it to some developer isnt really the right way to get it done either.

If you need something developed, make a bounty or contact some consultant who can make changes specific to your needs and reqs (depending on your timeframe).

Thanks for the explanation

The combination of #703 (available under version 2.1.0) and #12005 (planned) together will solve this.
