**説明**

In IRC I suggested that Redmine take a page out Trac's book and support the following syntaxes for auto-generating links in commit messages, in comments to issues, and wiki pages:

- [commitID]
- [commitID-anotherCommitID]
- [commitID,anotherCommitID,yetAnotherCommitID]

And allow the resultant page to handle it based on how the underlying repo handles it (afaik, most of them support those syntaxes).

I was told it was a good idea and to create a ticket.
