This feature is just like the trac.
You can exported the changement with zip format, it will keep the directories structure, so we can just extract the archive and overwite it by the path.

journals

+1

Handy when you use a SCC provider your users are not all comfortable with, such as Git.

Maybe this ticket should be placed in SCM Category. ;)

Hi, i hope this feature can be moved 0.9 version.

Thanks.

+1 For this to be implemented.

+1

Any idea, when this feature could be implemented? Is it a big task?
