説明

The email of an issue that includes a "source:" link is included in the email as a relative link ala:

[source:...](#)

The link needs to be made absolute.

Not sure if this applies to other links besides source: links..

Ruby version 1.8.6 (i386-mswin32)
RubyGems version 1.3.1
Rails version 2.1.2

journals

This issue should be resolved with the attached patch.

The @link_to@ for source: and export: links wasn't setting @:only_path => only_path@, so the links weren't being converted to absolute links in emails, etc..

Index: app/helpers/application_helper.rb

```

Please also see Feature #4052 for additional enhancements to source and export links, as well as enhancements to commit, and revision links from #3346.

--Bill

I tested it with this comment. I was able to reproduce it. I get a mail with some invalid link. This should be corrected.

Patch applied in r13219, thanks.
Merged.
