The text formatting documentation does not give any significance to surrounding text with single brackets. However if a line starts with bracketed text AND it is not followed by a space then it gets destroyed.

Here are some examples, compare the source vs. the rendered version:

Example 1: [This] works correctly
Rendered as:
[This] works correctly

Example 2: [This]doesn't work so well
Rendered as:
[This]doesn't work so well

Example 3: [This]is broken
Rendered as:
[This]
is broken

journals

This is fixed in trunk.
