説明 I would like the admin to be able to create user accounts without email addresses attached to them. This way the project manager could already • assign tasks to people who have not yet an account • or, for managing purposes, I also have the situation where the "next activity" lies with a person that i don't want to have a redmine account yet.			
journals +1 We have external developers, but we don't want insert external mail addresses			
related_issues duplicates,Closed,9213,User without email duplicates,Closed,5033,No email notification for some users
