説明

The latest Romanian translation update was committed to #2900.
The patches do not contain the translation with diacritics.
I believe Cristi Harjoi is the author of the current translation, please revise the translation!

journals

Well, you can yourself add missed stuff, just edit config/locale/ro.yml and attach it here.

This is what we did:
<http://fpaste.org/hj8L/raw/>

The status remains New until it won't be introduced upstream (or proposed another solution).

Thank you.

Just added diacritics and corrected grammer and spelling.

Note to people who want to help in the future: some strings left untranslated, terminology needs more work.

Thank you.

My file is the same thing.

OK, fixed now.
