説明

Pages without a sidebar lack the right border on the content div with the alternate style. It's enough to specialise the #content style in the alternate css with a #main.nosidebar #content to get it back. (test on Safari 4, redmine r2902).

git diff:

Just wanted to get this off my plate. Eric, I noticed you incorporated some css fixes, would you mind taking those in too? Thanks :-)

Applied in r3069.

Note that the patched line was truncated in your diff.

Thanks, and sorry for the truncated diff.
