| <b>説明</b> <p>I'm running redmine since 2 month. My current version is 0.8.5.devel.2956.<br/>I've migrated two trac projects some time ago with no issues. The migration of the 3rd project not working perfectly, because tickets, files and custom values are not migrated. Take a look:</p> <p>Migrating components....<br/>Migrating milestones.....<br/>Migrating custom fields....<br/>Migrating tickets.....<br/>Migrating wiki.....</p> <p>Components: 4/4<br/>Milestones: 8/8<br/>Tickets: 0/25<br/>Ticket files: 0/7<br/>Custom values: 0/100<br/>Wiki edits: 11/11<br/>Wiki files: 0/0</p> <p>The wiki:<a href="#">RedmineMigrate</a> says: <i>Before starting, you need a fresh Redmine database, with default data loaded (required)</i><br/>Is this my problem? My redmine database (sqlite3) is not fresh I think. What can i do?</p> |                                     |                             |            |
| <b>journals</b> <p>Is this my problem? My redmine database (sqlite3) is not fresh I think.</p> <p>Yes, it may be the problem.</p> <p>What can i do?</p> <p><b>Have a look at lib/tasks/migrate_from_trac.rake and adapt it to fit your needs.</b></p> <p>I have migrated from Trac to my Redmine (PostgresQL RDBMS which was NOT fresh) and everything worked well, except issue #3910</p> <p><b>regards</b></p> <p>If the database isn't fresh enough, why components and milestones were migrated?</p>                                                                                                                                                                                                                                                                                                                                            |                                     |                             |            |

On wich line I've to look redarding fresh database test? I cannot find the right one...

Sorry, I can't provide such support here.

And I can't fix anything without a detailed bug report.

The problem are custom fields witch are *RequiredFor all projects*. If you uncheck this setting, the migration of tickets succesfully done. I think it would be nice, the trac migration script fires a warning, if exist required custom fields for all projects.
