journals

The easy place to patch is truncate\_single\_line.

You can call to\_s somewhere before calling gsub. This will guard the string argument (in case it isn't a string).

```
# Truncates and returns the string as a single line  
def truncate_single_line(string, *args)  
  truncate(string.to_s, *args).gsub(%r{[/\n]+}m, ' ')  
end
```

Fixed in r2983.
