説明

I just saw this bug on a project of mine.

We have three tickets, one is closed and two are completed at 100%. The percentage bar shows a tiny whitespace on the right since it miscalculates the percentage of the second td.

Checking the outputted HTML the first td(@.closed@) has a width of 33%, the second td(@.done@) has a width of only 66%, not 67% which it should have. This makes the last td(@.todo@) with a 0% width percentage take up 1% therefor creating the white space to the right.

I've attached a screen dump of it and although I am not using the default CSS(Cascading Style Sheets) I double checked that as well and found it showing the same.

Redmine r3023

journals

Fixed in r3082.
