説明

Typing (for example)

\$. foo
\$. bar
\$. something

should result in

a. foo
b. bar
c. something

regards

journals

+1. I really have the habit to follow a, b, c pattern over 1,2,3. This would be very useful addition.

Ideally, it would be even more interesting to have

#. foo
#\$. foo-details
#. bar
#\$. bar-details
#\$. bar-details-2
#. something

1. foo
1.a. foo-details
2. bar
2.a. bar-details
2.b. bar-details-2
3. something
