#### 説明

redmine system should add the approval workflow or permissions for issue timelog.

journals

!Timelog\_approved.jpg!

+1 for approval workflow or something equivalent.

Would it not be more appropriate to show the status?

Showing only whether is is approved or not kind of narrows the scope and, I think, usefulness.

I have added an image to show the point  
!status\_column.PNG!

I have also created a patch for this issue against the current trunk.

Updated the patch

Forgot to mention that the patch is based on revision r3351

Ngewi Fet:

I think li wei was asking for an approval workflow for Time Entries. Like:

- Eric logs two new time entries
- Bob (Manager) reviews Eric's time entries
- Bob approves one but declines the other one because it was logged with the wrong Activity

I personally wouldn't use this and I think it could make things more complex. If it's added, it should be optional or be done in a plugin.
