+Context+
From Roadmap > Version X you can see all the details of the version + the content of the associated wiki page.
You can also edit details with the upper-right 'Edit' link.
But -- correct me if I'm wrong -- you can't edit the wiki page directly. You have to go to the wiki section and find the page.

+Description+
This mini-feature would add a link on the version details leading to the wiki page (read or already edit mode, TBD).

+Benefit+
This will save some time when editing (I don't know about you, but I do it all the time).

journals

Here my proposed patch.

Felix Schäfer wrote:

Great! It's a small but time-saving change which might be targetted to Redmine version #21??

I've updated the patch so it merges correctly (the locales fail to merge, the code works ok though), the commit can be found here:
http://github.com/thegcat/redmine/commit/f1a8ca801f728d9ed6ed40467fd0c73ecc768219

@JB: this one's for you :-)

Thanks, committed in r4101 (I added french translation, I presume Azamat will deal with other locales).

@FS, JBB,

r4101 misses the @:id@ parameter in the URL. This leads to incorrect links to the designated wiki-pages (in my case it led to an edit-link linking to the correct-page in wrong projects (since it uses the @version_id@ as the @project_id@)).

This can be fixed easily by applying the following patch:

Index: app/views/versions/show.rhtml
===

```
---   app/views/versions/show.rhtml        (revision  4101)
+++   app/views/versions/show.rhtml        (working  copy)

_title.blank?  ¦¦  @project.wiki.nil?  %>
   <%=  call_hook(:view_versions_show_contextual,  {  :version  =>  @version,  :project  =>  @project  })  %>
```

Thanks Mischa, I'll have a look at it.

Is there any reason why links in "Roadmap" section and "Settings" section are not the same ? The first ones are scoped under the project, the second ones not. Maybe it should be unified too.

Hmm, not sure but I guess it's mainly due to historical design choices by JPL which may have been obsoleted/changed in time. Limited by my current skills/time I'm not able to say whether it should/could be unified..

Let me know when this is ready for 1.0.2 and I'll merge r4101 along with the fix.

JBB,

Could you also take a look at the related issue #6435?

Ok, just adapted Mischa's patch to trunk and used the same link in the project settings > versions. The idea for the later was to only show the title instead of the link to the wiki page if the user doesn't have the permission to view it, but @link_to_if_authorized@ doesn't seem to get it correctly, I suppose that's a problem with @link_to_if_authorized@ rather than with the changes here though.

See http://github.com/thegcat/redmine/commit/45dd6cf75fefdae756e82c305231d59814d4260c (also fixes #6435)

Have you investigated the problem with @link_to_if_authorized@ ? Anyway, I applied the patch in r4307 for 1.0.3 release (Eric: don't forget to merge r4101 too), hoping we could simplify those statements soon.

Jean-Baptiste Barth wrote:

> Have you investigated the problem with @link_to_if_authorized@ ?

No, and I have other more important stuff to tackle before that. Opened #6776 to remember to investigate that.

Merged into 1.0-stable for release in 1.0.3
