In current trunk, the selected tab in project settings or redmine settings has a visible @border-bottom@, which wasn't there some revisions ago. This is for the alternate theme and current trunk, although I have narrowed down the change to somewhere between r3140 and r3211.

journals

I can confirm the issue using source:/trunk@3255 together with the [[ThemeDefault|default]] theme. I was able to trace it back to r3174.

It's caused from this css:

#content .tabs {height: 2.6em; border-bottom: 1px solid #bbbbbb; margin-bottom:1.2em; position:relative; overflow:hidden;}

The tabs div has a bottom border that is visible above all of the tabs.

Mischa is correct: this behaviour was introduced by r3174.
The attached patch (attachment:defect4495.patch) should fix the problem in the default and alternate themes for Firefox and IE on Windows.

I haven't been able to test it on any other browsers (volunteers?)

Works on Safari/OS X (so probably every webkit browser) too, my css-foo isn't good enough to judge of the sanity of the patch though.

(forgot to mention that I tested this on alternate, not default, but that should work on it as well)

I was aware of this issue but I didn't even try to fix it, thanks for the patch.

Tested on default theme with Firefox 3.5.7, IE 8 and committed in r3325.
