説明 I ' d like things like the version pulldown to be sorted in descending order. This is because the most common action is associate new/unversioned issues with the “ latest ” version.			
journals Sounds like a feature request, doesnt it. That said, i would add a +1 for a chance to config sort order on version and category. +1 This is more likely a feature request than a bug. But I would agree, some type of sort would be some improvement for this!			
related_issues relates,Closed,23137,Completed versions on Roadmap: Sort it so that recently created versions are on top
