説明

When attempting to export issues to a PDF that are sorted by a custom field, an Internal 500 Server error is displayed to the user. The production.log shows that an undefined method being the cause.

Environment -

Found in RC1 0.9, Ruby 1.8.6, Rails 2.3.5, Rack 1.0.1, mysql
User language is English.

Steps to reproduce -

Install RC 1 of 0.9 from RubyForge

Create several issues

Create a custom field

View the issue list

Group the results by that custom field

Export the issue list to PDF

Observe the Internal server 500 error is displayed to the user

Note - Log file excerpted below.

Expected Result -

User should be able to export issues to PDF when grouped by a custom field.

Rendering /XXXXXXXXXX/redmine/public/500.html (500 Internal Server Error)

journals

Original description and bug subject should have used the word "Grouped" and not "sorted".

The problem is with grouping.

Fixed in r3333.
