説明

"Project A" has a sub-project called "Project B". Project B has a version called "Release"

If you look at the "Project A" Gantt chart then the title for the Project B version is

Project B - Project B - Release (The first "Project B" is part of a link along with "Release")

The HTML code is

```
Project B -  
Project B - Release
```

With longer project names this becomes a problem so for versions can we remove one of the project references

journals

Fixed in r3406.

Thank you very much; fix works fo rme.

Merged in 0.9-stable in r3431.
