説明
It's possible to track "user's activity":http://www.redmine.org/activity?user_id=1 from "user's page":
<http://www.redmine.org/users/1>, "project's activity":<http://www.redmine.org/projects/redmine/activity> from project's page and
"user per project activity":http://www.redmine.org/projects/redmine/activity?user_id=1 from ... where? Looks like there is no visible link for the last one.

journals
It actually works. Just need to find where to add these links.
How about to convert user names in project's activity page into this links?
Well, that would make lots of additional links.

related_issues
relates,Closed,33602,Add an interface to filter activities by user
