説明

Go in /time_entries/report (all projects)
Select "Last 7 days"
Select "days" in details, add something, the report shows and sums 8 days.

journals

Confirmed
And I noticed that "Last 30 days" filter displays 31 days.

Here is the patch.

The patch won't apply cleanly, as the corresponding code is completely rewritten.

But I'm still able to reproduce this (see attachment).

Noticed this same problem on the latest redmine - It was telling me i have worked 48 hours in the last week!

"In the past N days" filter in Current trunk (r16111) has the same behavior.
Not only spent time filter but also issues filter has the same behavior.

!spent-time-filter-r16111.png!
