説明 It could be usefull if there is a check button "Is unique" when creating a custom field. So, two issues could not have the same value for a custom field. For example, I created a custom field "Id" witch is equal to the id of an issue but for my customer and I need this custom field unique.	
journals +1 [x] Unique	
Hi, this is not the same problem as having Auto Number feature. For instance I need to create Custom Field storing an OrderID (entered manually) and I want it to be unique across all tickets. Is there a way to achieve it?	
Still need unique :) amd autoincrement... (converting my old FileMaker Inventory database to Redmine, R.I.P. FileMaker) +1 for unique. +1	
related_issues relates,New,13378,Custom fields Type Auto Number Increasing relates,Closed,16371,I suggest the new fuction about the Custom fields
