説明			
<p>I'd love to be able to filter the issues list to any issues that are either:</p> <ul style="list-style-type: none"> • assigned to myself or no one at all or • having a target version of 'next release' or has no target version assigned. <p>Currently I'm doing that by setting up filters such as "Assigned to" is <u>not anyone else on the list</u>. The problem with that is that the filter slowly gets less and less useful as new users are added to the system.</p>			
journals			
<p>Did you try to select 'none' in the filter type list? (eg. Target version: none)</p> <p>I did, and that does half of what I need:</p> <p>I'm trying to show an issues list that contains all issues either assigned explicitly to me or not assigned to anyone. If "none" was moved from the "is"/"is not" drop-down menu and instead put atop the next list (perhaps shown similarly to the @<< me >>@ item), so I could have a multiple selection that contains either @<< none >>@ or @<< me >>@.</p> <p>+1</p> <p>related issue with patch: #5535</p> <p>Previous journal was created automatically during closing of #3600 due to the issue-relation. It does not apply to this issue.</p> <p>I believe this issue deals with having a possibility of having multiple selections for assignee & target version issuelist filters, for example including a 'blank' value.</p> <p>I'll adjust the issue-subject and "fix" the issue-relations accordingly.</p> <p>Note: status-change is necessary to put the issue in the (correct) new status again after the previous incorrect closure.</p>			
<p>+1</p> <p>Good feature</p>			

2 possibilities :

1. add <> in list, so we will able to select <> and someone
2. add a logic operator list with 'AND' 'OR' Patch on #5535 is obsolete with 2.2

----- +1 -----

related_issues

relates,New,5535,Assigned to issuelist filter: added value

relates,New,3868,Start- & Due date issuelist filters: allow to specify multiple selections (e.g. x OR blank)

duplicates,Closed,8320,Add "Assigne is / is not <>" into filters
