説明
Currently, #content overflows right sidebar if it is too big. The patch adds a scrollbar to #content on that situations.

When does this overflow? Can you post a url example, a screenshot, and the browser you're seeing this in?

Hi Eric,

I've removed the overflow attribute from my local installation and apparently the problem has gone in some prior commit. So this issue can be cancelled.

Thanks for caring about.

Rodrigo Rosenfeld Rosas:

I remember seeing some changes about that, glad it was already fixed. Thank you for the feedback.
